Green Line Extension RFR Amendment

Possible Use of Federal Funds

To maintain financial flexibility and preserve all options for the implementation of the project, the Executive Office of Transportation is considering the possibility of pursuing the use of federal transportation funding for the Green Line Extension. Should this option become a reality, the Executive Office of Transportation could require the consultant selected through this procurement process to prepare necessary submittal materials for the Federal Transit Administration New Starts program, as well as all materials associated with an Environmental Impact Statement. Prospective consultants are encouraged to consider this possibility in assembling their proposals for this procurement.
